Antiracism CoalITION in Pain Research

The Antiracism CoalITION in Pain Research (ACTION-PR) is a group of pain scholars from various disciplines and areas of research (i.e., pain inequities) that was formed in September 2020 with the goal of addressing racism in pain research practices. Since its formation, the ACTION-PR has conducted a think tank with other pain researchers to reflect on ways in which racism manifests in the continuum of pain research. Continued discussions among ACTION-PR members following this think tank shaped the

Chair of the Diversity, Inclusion, and
Anti-Racism in Pain SIG

development of an Antiracism Framework for pain research.

Our proposed framework addresses racism from study conceptualization to the dissemination of findings is described in a three-paper series titled "Confronting Racism in Pain Research," which was recently accepted for publication at the Journal of Pain. The ACTION-PR has continued these efforts through ongoing discussions and presentations, including a symposium presented during the inaugural USASP conference. We would like to share that we will also be presenting another symposium at the upcoming conference "Continuing to confront racism in pain research: An updated call for a shared commitment across the field of pain." Please join us if you can.

UPCOMING EVENT!

US Association for
the Study of Pain

Educational Webinar Series - Let's learn about

SLEEP METHODS IN PAIN RESEARCH

Speakers

**PATRICK
FINAN, PHD**

JOHNS HOPKINS UNIVERSITY
SCHOOL OF MEDICINE

**CHLOE
ALEXANDRE, PHD**

JOHNS HOPKINS UNIVERSITY

**ALBAN
LATREMOLIERE, PHD**

JOHNS HOPKINS UNIVERSITY

Moderators

**DANIEL
WHIBLEY PHD**

MICHIGAN MEDICINE UNIVERSITY
OF MICHIGAN

**CHUNG
JUNG MUN PHD**

ARIZONA STATE UNIVERSITY

On **February 23, 2022** from 3-4 pm (eastern) the Educational and Professional Development Committee and the Sleep and Pain SIG will be presenting a seminar on “Sleep Methods in Pain Research”.

Following the seminar, there will be a Networking Session (4-5pm ET). To facilitate informal conversations, we will be using the platform Gather.Town. Please indicate on the registration form (use button below) if you would like to attend the networking event. A link to attend the networking session will be sent the day of the event. We hope this platform will allow you to mingle and chat with the panelists and moderators from the event.

These events are free to USASP members or a \$10 fee for non-members.

Registration is required.

Acute (to Chronic) Pain SIG Seminar Series

Laura Payne PhD from McLean Hospital/Harvard Medical School will be giving the next talk "Is Dysmenorrhea a Risk Factor for Chronic Pain?: Behavioral and Neural Evidence of Central Sensitization of Pain In Young Girls" on **February 16 from 2:00 pm to 3:00 pm (eastern)**. Email admin@usasp.org for a link to join the meeting.

BOOK CORNER

EDITED BY JOHN LOESER &
DAVID TAUBEN

PAIN A Very Short Introduction
Book by Rob Boddice

"A small treasure for pain researchers
or clinicians."

A review of PAIN A Very Short Introduction

This all-too-brief book is one of hundreds in the Oxford “Very Short Introduction” series of definitive texts on a wide array of subjects. It is a wonderful treatise on the history of thoughts about pain, especially chronic pain, written by a philosopher without patient care experience but with a vast expanse of knowledge about the history of thought. The scope is wide: Pain concepts, Pain and piety, Pain and the machine, Pain and civilization, Sympathy, compassion and empathy, Pain as pleasure, Pain in modern medicine and science, Chronic pain, Cultures of pain are the chapter headings. These are followed by extensive references and suggestions for further reading. There are black and white illustrations in most chapters, although the small size of the book (4 ¼ by 6 ¾ inches) is problematic.

This little book is a treasure trove of information about pain as a cultural event. It does not include any discussion of patient management or treatment, but it does delve into many of the controversies that make treatment of chronic pain a contentious activity. It is a good source of information about the history of thoughts about pain and its significance in human endeavor. Of great importance is the author’s support of the biopsychosocial approach to thinking about pain and pain patients. The book is a rapid read and will enrich the reader’s understanding of the histories of pain and the complexities that so plague modern thought.
