Workshop Description

Drawing from validated mentorship development curricula, this interactive half-day workshop will provide experiential training designed to optimize the practice of mentorship with highlights on the issues encountered in pain research mentorship. Topics to be addressed include:

1. The science of mentorship
2. Communication and alignment of expectations
3. Mentoring across diversity
4. Promoting well-being and resiliency

Course materials will be shared electronically with all attendees.

Who Should Attend the Workshop?

This workshop is for pain scientists at all levels, including early and mid-career faculty who are actively engaged in mentoring (or want to be) and are interested in optimizing their mentoring relationships.

When and Where
